

WHAT IS CLAIMED IS:

1. A personal care absorbent article having a spliced absorbent material, the article comprising:

a fluid permeable body side liner for placement adjacent a wearer; and

5 an absorbent core attached to the body side liner for absorbing fluid passing through the liner, said absorbent core including:

a first portion of absorbent material;

a second portion of absorbent material; and

10 a piece of splicing material directly attached to said first and second portions of absorbent material, said splicing material having a fluid permeability at least about 25% as great as a fluid permeability of said first portion of absorbent material and at least about 25% as great as said  
15 second portion of absorbent material.

2. A personal care absorbent article as set forth in claim 1 wherein said splicing material has a fluid permeability at least about as great as a fluid permeability of said first portion of absorbent material and at least  
5 about as great as said second portion of absorbent material.

3. A personal care absorbent article as set forth in claim 2 wherein said article is a feminine hygiene product.

4. A personal care absorbent article as set forth in claim 2 wherein said article is a diaper or training pants for a child.

5. A personal care absorbent article as set forth in claim 2 wherein said article is an incontinence product for an adult.

6. A personal care absorbent article as set forth in claim 2 wherein said piece of splicing material is thermally bonded to said trailing end of said first portion and to said leading end of said second portion.

7. A personal care absorbent article as said forth in claim 6 wherein said piece of splicing material comprises a carded web of bicomponent fibers.

8. A personal care absorbent article as set forth in claim 1 wherein said first and second portions of absorbent material each include fibers having polyolefin content.

9. A personal care absorbent article as set forth in claim 1 wherein said piece of splicing material is thermally bonding to said first and second portions of absorbent material.

10. A personal care absorbent article as set forth in claim 1 wherein said splicing material is a carded web comprising bicomponent fibers.

11. A personal care absorbent article as set forth in claim 1 wherein the trailing end of said first portion is arranged squarely end-to-end adjacent the leading end of said second portion.

12. A personal care absorbent article as set forth in claim 1 wherein said trailing end of said first portion overlaps the leading end of said second portion.

13. A personal care absorbent article as set forth in claim 1 wherein each of said ends of the first and second portions of absorbent material has a first major surface and an opposite second major surface, and wherein the piece of splicing material comprises is attached to at least one of said first and second major surfaces of each of said ends.

14. A personal care absorbent article as set forth in claim 13 wherein the first surface of the trailing end of the first portion and the first surface of the leading end of the second portion are oriented in an identical direction, and wherein said piece of splicing material is attached to the first surface of the trailing end of the first portion and to the first surface of the leading end of the second portion.

15. A personal care absorbent article as set forth in claim 14 wherein said piece of splicing material is a first piece of splicing material attached to said first surface of the trailing end of the first portion and to said first surface of the leading end of the second portion, further comprising a second piece of splicing material attached to the second surface of the trailing end of the first portion and to the second surface of the leading end of the second portion.

16. A personal care absorbent article as set forth in claim 13 wherein the first surface of the trailing end of the first portion and the first surface of the leading end of the second portion are oriented in an identical direction, and wherein said piece of splicing material is attached to the first surface of the end of the first portion and to the second surface of the end of the second portion.

17. A personal care absorbent article as set forth in claim 13 wherein the piece of splicing material is wrapped around both of said surfaces of each of said ends.
